SDN®

SDN® Technology allows for low-cost, high-throughput nanocomposite multifunctional coatings deposition on almost any substrate.

PRESS RELEASE

July 13, 2016
For Immediate Release

Advenira Enterprises considers Technopolis "Himgrad" as a potential site for large-scale production of SDN® materials and precursors.

SUNNYVALE, Calif. (July 13, 2016) - Advenira Enterprises, Inc., the developer of Solution Derived Nanocomposite (SDN®) technology for environmentally friendly protective and optical coatings, announced that it has been engaged in an active dialogue with the top officials of the Republic of Tatarstan, Russian Federation, to establish a production facility for SDN® materials and precursors at the Technopolis "Himgrad" (<http://www.himgrad.ru/>) in the city of Kazan'. Kazan' is the eight largest city in Russia with over a thousand year old history, and is officially branded "The Third Capital" of Russia.

Elmira Ryabova, Ph.D., President and CTO of Advenira Enterprises, has met with the President of the Republic of Tatarstan Rustam Minnikhanov to present the SDN® technology and its advantages, as well as to discuss the opportunity for establishing an industrial production facility for SDN® materials and precursors at the Technopolis "Himgrad" in Kazan'.

Based on President Minnikhanov's feedback, a working group that includes experts from Advenira Enterprises, Inc., and representatives from local oil, gas, and petrochemical companies, is being created, in order to work out the specific details of the expected industrial integration and continued collaboration between Advenira Enterprises, Inc., and Oil & Gas end user companies.

Advenira is very excited about the opportunity to establish a large-scale production facility for SDN® materials and precursors in such a reputable, innovative, and renowned region as the Republic of Tatarstan!

About Advenira Enterprises, Inc.

Advenira Enterprises, Inc. is a California-based company located in the heart of Silicon Valley known for its novel Solution Derived Nanocomposite (SDN®) technology that allows for low-cost/high-throughput multifunctional coatings deposition on practically any type/shape/material substrate. The nanoscale protective and optical coatings are environmentally friendly. The company was founded as a means to address the world's increasing energy consumption and waste. Advenira commercializes its patented technology in the Glass, Corrosion, Electronics and other markets - spanning the world's
