## SDN® Technology

allows for low-cost, high-throughput nanocomposite  
multifunctional coatings deposition on almost any substrate.

### PRESS RELEASE

May 9, 2017  
For Immediate Release

**SUNNYVALE, Calif. (May 9, 2017)** - Advenira Enterprises, Inc. announced that on May 9, 2017, it has established a Turn-key Platform for Industrial Application of SDN® Optical Coatings in core segments – from automotive to architecture, solar and appliances glass and ceramics.

For us, Turn-key Industrial Platform means a reliable outcome of multidisciplinary work around:

[COATING MATERIALS](#) · [PRODUCTS DESIGN](#) · [APPLICATION PROTOCOLS](#) · [COATING EQUIPMENT](#) · [INTEGRATION](#)

In opposite to widely available PVD, CVD, PVB, Window Films technics and approaches, SDN® is a Liquid-based, Atmospheric and High Throughput Platform. Besides unique coating solutions, it allows Significantly Lower CAPEX, OPEX, Footprint and Operating Expertise. It makes SDN® Platform available for mid-size and even small companies.

For our partners in glass industry it opens Huge Opportunities in commercialization of unique glass products with advanced characteristics - create differentiation factors and improve operating margin, while deliver attractive products to customers at a very competitive price.

Advenira's team has been able to create, fine-tune and validate a set of state-of-the-art coating solutions. Today they can be delivered on full size glass at high throughput:

- AdvenSol® - Solar Heat Control, Nonconductive, Transparent for RF;
- Crysollion® - Solar Heat Control, Heatable/Defrosting, TCO;
- Impermion® - Durable Anti-Soiling, Anti-Reflective & Easy Cleaning;
- DiffusGuard™ - Diffusion Barrier;
- New Coating Materials - Anti-Fog, Self-Cleaning, Anti-Scratch, Strengthening.

We are honored to provide our expertise and SDN® Platform to leading glass manufacturers, automotive, transportation, appliances, PV OEMs, construction and other companies all over the World.

## SDN® Technology

allows for low-cost, high-throughput nanocomposite  
multifunctional coatings deposition on almost any substrate.

---

**Advenira Enterprises, Inc.** is a California-based company located in the heart of Silicon Valley known for its novel Solution Derived Nanocomposite SDN® Technology that allows for low-cost/high-throughput multifunctional coatings deposition on practically any type/shape/material substrate. The nanoscale protective and optical coatings are environmentally friendly.

Advenira commercializes its patented technology and coatings in the Glass, Corrosion and other markets - spanning the world's most important industries - with dramatic advantages over traditional techniques, solutions and coating materials.

The company was founded as a means to address the world's increasing energy consumption and waste generation. For more information, please visit [www.advenira.com](http://www.advenira.com).
